Sustainable Smart City Assistant Using IBM Granite LLM Eco Tips Generator During an environmental awareness session at a local school, the teacher uses the “Eco Tips” assistant. Students input keywords like “plastic” or “solar” and receive actionable AI- generated tips on living sustainably. give the code for that for my project work

BLACKBOXAI

I'll create a comprehensive "Eco Tips" assistant web application that connects to IBM Granite LLM for generating sustainable living tips based on student inputs. The UI will be engaging, educational, and fully responsive.
